

ITD Assignment 1

#	Basic	%		Note
B1	Application must work in Unity Editor.	4%	✓	compiles but ar sim doesnt work for reasons beyond our control (i have a video to plead to mr elyas on this)
B2	Application must have a clear start (e.g. a start menu for users to start the experience)	4%	✓	start menu present
B3	Application must have a clear end (e.g. player is informed they have completed the experience and prompted to return to start screen)	4%	✓	"the cat is satiated" to tell you to fuck off
B4	Application must use Image Tracking.	4%	✓	PokkatCore.ImageHandling
B5	Spawned objects from Image Tracking must be interactable through UI.	4%	✓	pet button
B6	There must be an overarching objective for users (e.g. scan all image targets, collect all objects, etc.)	4%	✓	prompts hint what to do
B7	There must be some indication on player progress (e.g. UI on screen)	4%	✓	gameplay hud: prompts + stat bars
B8	There must be some feedback when player has completed a task (e.g. collected 1/5 objects, scanned 1/3 targets, etc.)	4%	✓	gameplay hud: stat bars
B9	Models used must not just be primitive shapes in Unity (e.g. Cube, Capsule, Cylinder, etc.)	4%	✓	neko and bowl models
BX	3D Models must be textured	4%	✓	neko and bowl models
ADDITIONAL FEATURE CHECKLIST (ITD)				
AR Features				
A1	The application can be deployed to a mobile device.	2%	✓	yes
A2	The application incorporates additional AR features, such as plane detection or face tracking.	3%	✓	PokkatCore.PlaneHandling
A3	AR objects within the application can interact with one another.	5%	✓	main neko plays with friend neko when spawned; neko moves to bowl when bowl is spawned
A4	AR objects are aware when other AR objects appear.	5%	✓	main neko plays with friend neko when spawned; neko moves to bowl when bowl is spawned
A5	The application has various forms of interaction between the player and AR elements.	3%	✓	pet via touch or ui button
A6	The application can track multiple copies of the same image, with one object per image.	7%	✓	unique friend nekos are spawned when new image trackers are detected
UIUX				
U1	The design of menus is cohesive and consistent with the rest of the application.	3%	✓	technically
U2	The application includes custom assets.	2%	✓	bowl; ui; neko...?
U3	UI elements are purposefully used and placed.	2%	?	cher u decide
U4	The application considers mobile screen requirements.	3%	✓	responsive game ui
Game Juice				
J1	Audio effects are effectively implemented within the game.	3%	✓	effective is questionable but there are audio effects
J2	The game includes feedback mechanisms.	3%	✓	neko jumps when you pet it
J3	The game responds appropriately to player actions.	3%	?	cher u decide
Promotional Material				
P1	Promotional Trailer for the project	3%	✗	
P2	Promotional social media posts for the project	2%	✗
